

LAGOON CUSTOM

Our brand new catamaran project perfectly embodies Lagoon Custom's vision of the modern motor-yacht.

With its slender lines and spacious indoor and outdoor living areas, this yacht is ideal for those who dream of first class cruises and voyages around the world to faraway places on a motor-yacht that is innovative, elegant, and environmentally friendly.

Efficient

Customers demand environmental responsibility, and the decision to make this unique yacht a catamaran brings with it greater energy efficiency. We designed hulls that minimize hydrodynamic drag for greater efficiency, resulting in a high performance yacht that consumes less energy. Its natural stability means that resource intensive stabilizers are no longer required, and makes the vessel all the more comfortable and safe to sail.

Exclusive and refined

We have made optimal use of the available space through an elegantly original layout. The spacious living areas are centred

on the main bridge where you can spend your time relaxing surrounded by panoramic views.

The ample owner's cabin opens out towards the bow, with a walk-in closet and bath on the second floor while the hulls hold four guest cabins.

The upper deck is reserved for piloting the vessel as well as for relaxation, with a sauna, gym, overflow effect Jacuzzi, and solarium.

The crew accommodation is discreetly located in the port hull, and the Captain's cabin is found on the upper deck.

Elegant

Our love for elegant yachts has given shape to dynamic, flowing shapes with expertly concealed superstructures.

Elegant, harmonious lines hint at the exceptional comfort and provide a taste of the high quality fittings that await on-board
