

LAGOON CUSTOM

When Lagoon Custom asked us to design a catamaran, I immediately took a pencil and started filling pages with drawings of catamaran silhouettes. The style is indeed the starting point for the design of a yacht, and an 80-foot catamaran is definitely a yacht which should make her owner proud!

Among the many drawings, I chose two, one for an 80-foot, the other for a 90' catamaran. I completed these drawings with the interior layouts: a serene ambiance, transparency and light for the guests' greatest comfort.

We have always paid special attention to the performance of our sailing mono-hulls, and this is equally true for these two catamaran projects. Both the 80' and the 90' will be high performance sailing yachts, including upwind, thanks to an important, stretched out sail plan. The hulls nevertheless, have very reduced draught.

These yachts combine the recognized properties of a catamaran with cutting-edge exterior aesthetics, and a quality art de vivre inside. Built by CNB Superyachts, they are genuine, unrivalled custom catamarans.
