

# LAGOON CUSTOM

VPLP has been designing multi-hulls for cruising and competition for 28 years. Our 100' is the result of a philosophy that finds balance between on-board quality of life and performance at sea. Cruising on a sailboat offers a unique relationship with time, and different experiences at different times of day. We take this, as well as the different situations that may arise with different groups on board, into account in the design stage. Light and 360° visibility bring you closer to the sea and surrounding area.

The efficient sail plan and hull design are the direct result of our experience in competitive sailing, and guarantee optimum performance from this catamaran with decidedly modern lines.
